

HOW TO MAKE A BLANKET

Please be sure to make your blanket(s) in a smoke and pet free space!

1. Cut a square out of each corner. The size of the square is relative to size of the patch or close to a 5x5 square.

2. Use the template to cut your strips, each one should be approx 1.5 inch and the same depth as you cut your square.

3. MOST IMPORTANT STEP: Tie strips together in a double knot! Tie the print to the solid/tie the top to the bottom!

4. Now its time to make your video! Make sure to write down the code on the blanket!
